MATERIALS

- 1. INSULATION SLEEVE: Heat-shrinkable, radiation cross-linked polyamide (Nylon) with a polyamide-based hot-melt adhesive liner. See above table for applicable sleeve color.
- 2. CRIMP SPLICE: Tin-plated copper alloy.

BASE METAL: Copper alloy C11000 per ASTM B152. PLATING: Tin-plated per ASTM B545, Class A.

APPLICATION

- 1. These parts may be used to obtain an environment-resistant one-to-one in-line (butt) splice in wires meeting the size range and diameter restraints specified herein and having a temperature rating of not less than 85°C.
- 2. * øA: (a) Minimum diameter as received: Wire insulation diameter must be less than this value.
 - (b) Maximum diameter after recovery: Wire insulation diameter must be larger than this value to obtain an environment resistant splice.
- 3. Wires are to be stripped per table, inserted into opposite ends of the crimp barrel, crimped with a TE Connectivity AD-1522 (22-10 AWG) or equivalent. For D-406-0034, Pro-Crimper III with die set 1976356-1 (24-26 AWG) or equivalent may be used. The sleeve must be heated along its entire length until the crimp marks are gone and the ends of the sleeve recover onto the wires.
- 4. Spliced assemblies will meet the requirements of TE Connectivity / Raychem specification RB-107.
- 5. Except for D-406-0034, all of the parts covered by this drawing are UL Listed (US and CANADA), File #E87681.
