FEATURES & BENEFITS

The Blacktips 9 LED offers outstanding light output in a functional design which can be easily adjusted, with either of the supplied trunnion or single bolt bracket options. High quality construction and components enable Blacktips to withstand vibration up to 21 Grms.

Built-in reverse polarity protection helps prevent accidental damage caused by incorrect installation.

Electronic thermal management ensures that if the light is subjected to a massive heat overload, that a self protection protocol is engaged to reduce the light output, until such time as the heat overload retreats to normal parameters.

Blacktips' LED work light range is a high quality, versatile range designed for Industrial applications such as rigid truck bodies, utility vehicles, emergency & rescue vehicles, cranes and more.
