S-RF SERIES LEDS

PIAA

SINCE 1963

The all new S-RF Series light bars brings the same unmatched lighting performance in a slimmed down package. This compact design measures in at an ultra low profile, 1.8" high housing which makes it the perfect option where you desire a low profile or are working with limited space.

Designed with the same Reflector Facing Technology as their predecessor, the RF-S line provides unmatched light output with a controlled beam that directs the light in a seamless beam pattern. The lamps are constructed in durable aluminum extrusion, with a high resistant poly lens. These lamps comply 100% to IP67 certification. The lights define durability and will outperform in any environment. The dual mounting system is versatile with both end brackets and sliding rear brackets included to fit most any bumper or mounting system.

- 6" & 9" S-RF Driving beam lamps offer focused long distance coverage in a compact size
- 20", 30" & 40" S-RF Combo beam lamps provide a long range driving beam pattern with enhanced side coverage
- UV coated reflector and poly lens for maximum protection from the elements
- 5600 Kelvin rating to maximize penetration in dark situations
- 50,000+ hour lifespan
- Lamp kits include hardware and a preassembled harness including switch, relay, & fuse
- Backed by a two-year warranty

S-RF Series LED Lights

Part No.	Description
DKSR65	S-RF 6" Driving Beam
DKSR95	S-RF 9" Driving Beam
DKSR209E	S-RF 20" Combo Beam
DKSR309	S-RF 30" Combo Beam
DKSR409	S-RF 40" Combo Beam
