

NEW! ChargerKit 40A 24V

Optimal charging performance

Reliable - Durable - Efficient

NEW! ChargerKit 40A 24V - for easier installation

A powerful and compact charger for heavy-duty vehicles

As the demand for power in buses and trucks is growing, the need for efficient battery charging is self-evident. Proper battery maintenance allows the driver and passengers to enjoy the comfort and convenience of being able to watch TV, charge their phone or use the coffee maker, without worrying that the batteries will become drained.

MultiCharger 40A 24V is a powerful and compact charger that can be easily installed in any engine compartment by using the existing 24V connections. It is based on modern switchmode technology and galvanized divisions and has 95% efficiency. It is ideal for battery sizes up to 500Ah, can maintenance charge batteries indefinitely and has IP67.

ChargerKit - for easier installation

Heavy-duty vehicles require tailored solutions and complete kits including charger, cabling and sockets. DEFA PlugIn ensure that the charger fits perfectly into a DEFA system - a system that can easily be extended with an inverter for access to 230VAC power. Read more on defa.com
